CNC MACHINING
RANCHO CUCAMONGA, CA

WE ARE A SMALL BUSINESS, MACHINE SHOP.

Solo Precision Inc. was founded in 2006, privately held small business in Rancho Cucamonga. Solo is equipped with high speed and standard Fanuc control machines. 3 and 4 axis capabilities. We have successfully manufactured complex and highly detailed components for the Aerospace and Defense industry.

QUALITY POLICY

Solo Strives to deliver the service and value that meet or exceed customer and regulatory requirements.

We commit to continually improve our QMS by establishing quality objectives, addressing risks and opportunities and promoting ethical behavior.

CAPABILITIES

6 CNC milling Machines,

All of Machines are strong and accurate Milling travel we go up to 42"X 22", 1 CNC Lathe, we can go up to 12" diam. On it.

All machines have Fanuc controls.

We are able to machine various Materials, most of our past work has been Aluminum in all alloys and hard metals ,titanium, Stainless steels of all types.

We run a lot of lathe mill combo parts, and smaller clips, bulkheads, fittings, bushings, rods, shafts, stringers, splice plates etc.

DIFFERENTIATORS

2 of our Quality Objectives for 2018/2019:
On time delivery to customers 98%
Product conformity to customers 99-100%

Higher end equipment:
In turn, better quality components:
Quicker cycle times:
Fanuc 18i & 31i controls, better program look ahead while running
